**MEASURES OF SUCCESS (Key Grant Outputs)** 

*22a. Description (e.g., "shellfish beds reopened")	*22b. Unit (e.g., "acres")	*22c. Project Target ("number")	*22d. Project Measure To- Date ("number")
Developed and distributed a final RFP to 21 Tribes and Tribal Consortiums for each fiscal year (FY10, FY11, and FY12)	RFP Document	3	3
Developed and engaged in a Coordination Plan, disseminating and sharing a subrecipient project information document each fiscal year (FY10, FY11, and FY12) with tribes and LO group	Subrecipient Proposal Information	3	3
Approved 21 subrecipient proposals, communicated award notification and executed contracts to all subrecipients for each fiscal year (FY10, FY11, and FY12)	Subrecipient Contracts in Place	63	57

#### **PROJECT MILESTONES**

**Instructions:** In the tables below, please explain your progress toward meeting agreed outputs for the period, **reasons for slippages**, and any additional information including **reflections**, **lessons learned**, **and/or thoughtful analysis**. When appropriate, include analysis and information of **cost overruns or high unit costs**, and changes to work plan or budget not requiring prior approval from EPA. We encourage photo documentation - please attach to the report as a separate document.

23a. Work Plan Component/Task: 1. Program development and launch

23b. Action Agenda Action(s) Addressed: D.3., NTA 3: Fund tribes to participate in the refinement and implementation of the Action Agenda, including salmon recovery plans.

\*23c. Estimated Costs: Actual Costs to Date:

(If required by PO)

23d. Sub- Task No.	23e. Sub-Task Description	*23f. Date	*23g. Status	23h. Outputs/Deliverables	*23i. Remarks
					NWIFC developed a
					communication/outreach plan for
					FY10 and FY11 that consisted of:
					(1) a transmittal note for the RFP;
					(2) a mailing distribution list that
		1.14.11, 7.12.11,		Communication/outreach	ensured that all eligible entities
1.1	Communication/outreach plan	6.22.12	COMPLETED	plan	were notified equitably, timely,

					and thoroughly; and (3) a target date for releasing the RFP.
					Due to our previous interactions and current relationships with our member tribes, we had in place a Puget Sound Tribes distribution list that contained pertinent tribal contacts. We vetted this distribution list to ensure that the proper contacts were included and additionally amended the list to include contacts from the two non-member tribes and two tribal consortiums. We have continued to add to this distribution list as needed and requested.
					NWIFC developed the final FY10 RFP through close consultation with the EPA, utilizing and editing the FY08 RFP to finalize the FY10's fundamental components and timeline. Additions to the FY10 RFP included: (1) language that fully described the intent of these funds; (2) requirements for all projects that collect environmental data to have a QAPP in place prior to data collection; and (3) logic model terminology. While we didn't include the traditional logic model table format, we utilized the logic model terminology to request specific outputs and outcomes per task.
1.2	RFP development and distribution	1.25.11, 7.15.11, 6.22.12	COMPLETED	Final RFP distributed	The FY10 RFP was then used as a template to develop subsequent fiscal year RFPs. Additions to the FY11 RFP included: (1) adding PSP Ecosystem Recovery Targets as eligible activities under this award; (2) a request to describe how the potential

					impacts of climate change will be addressed in the planning and implementation of the subrecipient project; and (3) additional guidance regarding the information needed in the budget narrative, including a task delineated budget appendix. In consultation with the EPA Project Officer, we finalized the proposal review process and timeline.  Additions to the FY12 RFP of note included: (1) clarifying language that delineated differences between subcontracts and professional services within the budget narrative section; and (2) adding a category within the narrative section that required an explanation of how technical review was going to occur for major techincal products of the subrecipient workplan. This provision on technical review was included to reflect and satisfy a new term and condition of NWIFC's contract that NWIFC and the EPA project officer collaboratively discussed and agreed upon.  As planned, we distributed the final RFP for FY10 on 1.25.11, for FY11 on 7.15.11, and for FY12 on 6.22.12.  NWIFC developed a coordination
					plan that can be executed throughout the project period and includes: (1) ensuring that the PSP is aware of the aims and activities of the subrecipient projects by enlisting them as a
1.3	Coordination plan	1.31.11	COMPLETED	Coordination plan	key reviewer of these subawards;

23a. Work Plan Component/Task: 2. Award cycle

23b. Action Agenda Action(s) Addressed: D.3., NTA 3: Fund tribes to participate in the refinement and implementation of the Action Agenda, including salmon recovery plans.

					FY11, and applicable FY12 subrecipient FEATS reports.
					Seven FY10 sites visits (Makah Nation, Samish Indian Nation, Nisqually Indian Tribe, Suquamish Tribe, Upper Skagit Indian Tribe, Swinomish Indian Tribe, and Nooksack Indian Tribe) and one FY11 site visit (Tulalip Tribes) has occurred. Additional FY11 site visits will continue into spring and summer '13.
					Site visits are conducted using a risk evaluation matrix to assess project progress and compliance with award requirements (including, but not limited to - adherence to workplan timeline; progress and completion of tasks and outputs; QAPP development, review, and/or approval status; desire/need for an EPA TSR; obstacles or problems encountered by subrecipient; progress report requirement adherence; review of funds spent and/or high award balances, if applicable; and subrecipient questions regarding award conditions, including proposal, review, and reporting requirements)
					All site visit reports are held at NWIFC and are available upon request.
		4.1.11, 1.10.12,		Exchange of project lists between LOs; Update of the PSP/NWIFC website to include subaward project descriptions and	NWIFC continued to: (1) engage the PSP as a key reviewer of these subawards; (2) meet with the EPA Project Officer to discuss relevant capacity awards of the subrecipients to ensure funding
3.3	Execute coordination plan	1.17.13	CURRENT	progress reports, as	duplication did not occur; (3)

	they become available;	participate in ECB, Leadership
	Other coordination	Council, PSP Salmon Recovery
	activities to be	Council, and PSP/Federal/Tribal
	developed in	Caucus meetings, as possible
	consultation with EPA	given the departure of the Puget
	PO	Sound Policy Analyst; (4)
		participate in scheduled LO
		meetings and disseminate a list of
		subrecipient projects for FY10,
		FY11, and FY12; and (5) update
		the PSP/NWIFC website to
		include meeting notes for ECB,
		Leadership Council, PSP Salmon
		Recovery Council, and
		PSP/Federal/Tribal Caucus
		meetings, as possible given the
		departure of the Puget Sound
		Policy Analyst.
		For FY10, the subrecipient project
		list was presented to other LOs
		and interested parties at the PSP
		Ecosystem Coordination Board
		meeting on 4.1.11. For FY11, the
		list was sent to the LO
		Coordinator's listserve on 1.10.12.
		For FY12, the list was presented
		and shared with the LO
		Coordinator's listserve on 1.17.13
		during an ECB meeting. The
		FY12 list and associated materials
		were also sent to the Puget
		Sound tribes distribution list on
		2.27.13 in preparation for an LO
		presentation at NWIFC. All
		subrecipient project lists have also
		since been posted online to the
		PSP/NWIFC website so that they
		are available in an easily
		accessible format for the public
		and interested parties.
		All FEATS and applicable
		attachments, once approved,
		continue to be posted online (in

				LO reporting	conjunction with their project description) to the Tribal Project Updates section of the PSP/NWIFC website.  Administration of the program, including periodic progress review, has been coordinated by the Projects Coordinator, under the tutelage of the Salmon Recovery Projects Coordinator.  NWIFC continues to be in close contact with NWIFC's EPA Project Officer, engaging in regular check-ins to clarify EPA proposal reviews and discuss challenges faced within the review process. The EPA Projects Officer continues to be extremely helpful, proactive, and communicative during the entirety of this award process.  The LO reporting requirements were successfully met for the reporting periods of 4.1.11 - 9.30.11, 10.1.1 - 3.31.12, and 4.1.12 - 9.30.13. The LO reporting requirements are in the process of being fulfilled for the 10.1.12
3.4	Reporting and adaptive management	11.30.11, 4.20.12, 10.31.12, 4.30.13	CURRENT	requirements fulfilled; quarterly check-in meetings/calls with EPA PO	being fulfilled for the 10.1.12 - 3.31.13 reporting period (as being submitted through this FEATS report).

Puget Sound tribes; and also provided presentations to the Puget Sound Partnership boards on behalf of NWIFC's Lead Organization.	The new Puget Sound Policy Analyst was hired on 3.25.13 and is currently fufilling the duties of this position to communicate and share Puget Sound information with Puget Sound tribes. If the PSP Management Conference engagement schedule is repeated for the FY13 workplan development, then the Puget Sound Policy Analyst will be able to partner with the Projects Coordinator to meet this commitment.

#### HIGHLIGHTS/LESSONS LEARNED/REFLECTIONS

\*25.

(1) HIGHLIGHT: While all 21 subrecipient proposals contain projects that will and are substantially contributing to the restoration and protection of Puget Sound, we have chosen to highlight the progress of the following subreceipient projects. Additional tribal project accomplishments are in the process of being reported to NWIFC for this reporting period. Once NWIFC has reviewed and approved subrecipient FEATS reports, due to NWIFC on 4/30/13, they will be posted online to the PSP/NWIFC website (http://blogs.nwifc.org/psp/).

Suquamish Tribe (FY11) - Chico Creek Riparian Acquisition and Protection: The Suquamish Tribe, in partnership with the Mountainers Foundation, successfully aquired and permanently protected for conservation 70 acres of stream and riparian lands adjacent to highly productive salmonid spawning and rearing habitat in the Chico Creek Watershed. This acquisition increased the Foundation's current ownership in the Chico watershed to a total of 414 acres. The Foundation will manage this land for conservation and natural forest succession such that over time, past effects of forest practices will be ameliorated.

Upper Skagit Indian Tribe (FY10) - An inventory and assessment of hydromodified bank structures in the Upper Skagit and Sauk River watersheds: The Upper Skagit Indian Tribe has successfully completed field surveys for the Chinook tributaries in the Skagit above the Sauk River, the upper Skagit River mainstem above Sauk, and the Sauk River watershed within the Chinook spawning range. The post processing of the GIS field attributes are currently being conducted. The Tribe has found that one of the most valuable lessons to date on the hydromodified bank inventory is the amount of habitat impacts (loss of floodplain channels) they have documented in the tributaries where they have surveyed. Previous efforts to quantify hydromodified impacts only focused on large mainstem sections and with this new data, they will now be able to begin planning restoration work in tributaries where they never previously had basin wide information to consider.

Squaxin Island Tribe (FY10) - Biological Recovery of Coho in the Deschutes Watershed: As part of their FY10 project, Squaxin Island Tribe is engaging in an Instream Flow Protection project in which they are calculating the relationship between summer streamflows, usable fish habitat, and the period of hydrologic record preparation for negotation and adoption of summer minimum flows through rulemaking by DOE. The technical work on this project is moving forward nicely and will be picking up during the summer months as instream flow data are evaluated. The adoption of summer minimum flows will allow assessment of one of the high level indicators proposed to evaluate the success of Puget Sound Restoration efforts - the number of days in July and August when steamflows fall below administrative minimums.

Port Gamble S'Klallam Tribe (FY10 & FY11) - Nearshore Early Marine Juvenile Salmonid, Forage Fish, and Marine Biodiversity Study: The Port Gamble S'Klallam Tribe has completed two field seasons of surface trawling, hydroacoustic surveys, and beach seining. All work was successfully implemented and the data collected has clearly demonstrated the importance of the nearshore environment for chum salmon outmigration from the Hood Canal and is expected to be particularly informative in respect to describing Hood Canal salmonid distribution. The Tribe is currently analyzing their data and by July 2013 will be producing acoustic data maps illustrating fish densities with estimated species composition based off surface trawl and beach seine data, salmonid condition factor values by sample station, and temporal CTD data plotted by sample station.
(2) REFLECTION: We continue to enjoy and highly value our good working relationship with the EPA and our project officer. Continued and consistent funding for hese high priority tribal projects is of the utmost importance to Puget Sound restoration and protection and we look forward to continuing to work with the EPA in current and future fiscal years in supporting our tribes and Puget Sound health.
